(71) Applicant (for all designated States except US): **UNIVERSITÄT ZU KÖLN** [—/DE]; Albertus-Magnus-Platz, 50923 Köln (DE).

(72) Inventors; and

(75) Inventors/Applicants (for US only): **KRUT, Oleg** [RU/DE]; Schiefersburger Weg 93, 50937 Köln (DE). **PALKA-SANTINI, Marie** [FR/DE]; Mohnweg 2, 50858 Köln (DE). **CLEVEN, Berit** [DE/DE]; Bachstr. 21, 53919 Weilerswist (DE). **KRÖNKE, Martin** [DE/DE]; Eugen-Langen-Str. 2, 50968 Köln (DE).

(74) Agent: **HELBING, Jörg**; P.O. Box 10 22 41, 50462 Köln (DE).

(81) Designated States (unless otherwise indicated, for every kind of national protection available): AE, AG, AL, AM, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, HN, HR, HU, ID, IL, IN, IS, JP, KE, KG, KM, KN, KP, KR, KZ, LA, LC, LK, LR, LS, LT, LU, LV, LY, MA, MD, MG, MK, MN, MW, MX, MY, MZ, NA, NG, NI, NO, NZ, OM, PG, PH, PL, PT, RO, RS, RU, SC, SD, SE, SG, SK, SL, SM, SV, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, ZA, ZM, ZW.

(84) Designated States (unless otherwise indicated, for every kind of regional protection available): ARIPO (BW, GH, GM, KE, LS, MW, MZ, NA, SD, SL, SZ, TZ, UG, ZM, ZW), Eurasian (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European (AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IS, IT, LT, LU, LV, MC, NL, PL, PT, RO, SE, SI, SK, TR), OAPI (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).

Published:

- with international search report
- before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments

(88) Date of publication of the international search report:
20 September 2007

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: ANALYTICAL DEVICE FOR RAPID IDENTIFICATION OF PATHOGENS

(57) Abstract: DNA microarray for rapid identification of candida albicans in blood cultures.

WO 2007/039319 A3

INTERNATIONAL SEARCH REPORT

International application No
PCT/EP2006/010132

A. CLASSIFICATION OF SUBJECT MATTER

INV. C12Q1/68

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
C12Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, EMBASE, MEDLINE, PAJ, WPI Data, Sequence Search

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	<p>NAKAMURA M ET AL: "DEVELOPMENT OF THE DNA MICRO ARRAY FOR IDENTIFICATION OF INFECTIOUS DISEASE CAUSACTIVE BACTERIA IN HUMAN"</p> <p>18 May 2003 (2003-05-18), ABSTRACTS OF THE GENERAL MEETING OF THE AMERICAN SOCIETY FOR MICROBIOLOGY, THE SOCIETY, WASHINGTON, DC, US, PAGE(S) ABSTRNOC219 , XP008047725</p> <p>ISSN: 1060-2011</p> <p>abstract</p> <p style="text-align: center;">----- -/--</p>	1-8, 10-25

☒ Further documents are listed in the continuation of Box C.

☒ See patent family annex.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family

Date of the actual completion of the international search

5 July 2007

Date of mailing of the international search report

INTERNATIONAL SEARCH REPORT

International application No.
PCT/EP2006/010132

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☒ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
1-4 (totally), 5-8, 10-18 (partially), 19-25
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☒ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

Invention 1: claims 1-7 and 10-25 (partially)

An analytical device for direct identification and characterisation of microorganisms in a sample or clinical specimen, wherein the device comprises species specific gene probes of at least 100 nucleotides, and in particular a device for Staphylococcus species identification, in particular for S. aureus identification, wherein, in this case, the microarray comprises the gene probe listed as SEQ ID N° 3 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of Staphylococcus aureus in a sample or in a clinical specimen.

A kit for the detection of Staphylococcus aureus in a sample or clinical specimen.

Inventions 2-176: claims 1-25 (partially)

An analytical device for direct identification and characterisation of Staphylococcus aureus in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 1-2, 4-141, 790, 798, 801, 802, 808, 812, 814, 818, 825, 827, 837, 840, 843, 844, 846, 848-852, 854, 855, 859, 862, 875, 885, 896, 897, 904, 907, 908, 935, 942, 2902, 2903, and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of Staphylococcus aureus in a sample or in a clinical specimen.

A kit for the detection of Staphylococcus aureus in a sample or clinical specimen.

Inventions 177-220: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of E. coli in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 142-173, 815, 833, 834, 836, 839, 857, 860, 886-887, 895, 901, 906, and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of E. coli in a sample or in a clinical specimen.

Inventions 221-258: claims 1-6, 8-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Staphylococcus epidermis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 174-208, 786, 806, 826 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus epidermis* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus epidermis* in a sample or clinical specimen.

Inventions 259-269: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus haemolyticus* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 209-215, 796, 803, 820, 938 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus haemolyticus* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus haemolyticus* in a sample or clinical specimen.

Inventions 270-276: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus lugdunensis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 216-221, 888 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus lugdunensis* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus lugdunensis* in a sample or clinical specimen.

Inventions 277-284: claims 1-6, 8-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Staphylococcus warneri* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 224-230, 831 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus warneri* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus warneri* in a sample or clinical specimen.

Inventions 285-286: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus saprophyticus* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 222-223 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus saprophyticus* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus saprophyticus* in a sample or clinical specimen.

Inventions 287-375: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus pneumoniae* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 523-605, 793, 805, 807, 813, 858, 929 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus pneumoniae* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus pneumoniae* in a sample or clinical specimen.

Inventions 376-420: claims 1-4, 6, 11-12, 14-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Streptococcus pyogenes* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 645-686, 800, 856, 928 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus pyogenes* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus pyogenes* in a sample or clinical specimen.

Inventions 421-477: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Klebsiella pneumoniae* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 399-448, 792, 794, 829, 899, 902, 903, 934 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Klebsiella pneumoniae* in a sample or in a clinical specimen.

A kit for the detection of *Klebsiella pneumoniae* in a sample or clinical specimen.

Inventions 478-504: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Klebsiella oxytoca* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 449-469, 789, 799, 816, 822, 898, 943 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Klebsiella oxytoca* in a sample or in a clinical specimen.

A kit for the detection of *Klebsiella oxytoca* in a sample or clinical specimen.

Inventions 505-571: claims 1-4, 6, 11-12, 13-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Pseudomonas aeruginosa* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 470-522, 785, 787, 791, 797, 804, 821, 832, 838, 841, 842, 884, 889, 905, 926 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Pseudomonas aeruginosa* in a sample or in a clinical specimen.

A kit for the detection of *Pseudomonas aeruginosa* in a sample or clinical specimen.

Inventions 572-611: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus agalactiae* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 606-644, 930 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus agalactiae* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus agalactiae* in a sample or clinical specimen.

Invention 612: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus mutans* in a sample or clinical specimen, wherein the microarray comprises the gene probe listed as SEQ ID N° 894 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus mutans* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus mutans* in a sample or clinical specimen.

Inventions 613-633: claims 1-4, 6, 8, 10-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Enterococcus faecalis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 308-398, 809, 811, 835, 864, 865, 880, 891, 909, 933, 936 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Enterococcus faecalis* in a sample or in a clinical specimen.

A kit for the detection of *Enterococcus faecalis* in a sample or clinical specimen.

Inventions 634-659: claims 1-4, 6, 8, 10-25 (partially)

An analytical device for direct identification and characterisation of *Enterococcus faecium* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 810, 817, 824, 847, 853, 861, 866-874, 876-879, 882, 900, 927, 931, 932, 939, 2887 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Enterococcus faecium* in a sample or in a clinical specimen.

A kit for the detection of *Enterococcus faecium* in a sample or clinical specimen.

Inventions 660-736: claims 1-4, 6, 11-25 (partially)

An analytical device for direct identification and characterisation of *Proteus mirabilis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 706-775, 788, 830, 863, 883, 890, 892, 940 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Proteus mirabilis* in a sample or in a clinical specimen.

A kit for the detection of *Proteus mirabilis* in a sample or clinical specimen.

Inventions 737-749: claims 1-4, 6, 11-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Proteus vulgaris* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 776-784, 819, 823, 893, 941 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Proteus vulgaris* in a sample or in a clinical specimen.

A kit for the detection of *Proteus vulgaris* in a sample or clinical specimen.

Inventions 750-835: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Candida albicans* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 231-307, 910-918 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Candida albicans* in a sample or in a clinical specimen.

A kit for the detection of *Candida albicans* in a sample or clinical specimen.

Inventions 836-864: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Acinetobacter baumannii* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 2843-2863, 2865, 2866, 2868-2870, 2888, 2907, 2908 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Acinetobacter baumannii* in a sample or in a clinical specimen.

A kit for the detection of *Acinetobacter baumannii* in a sample or clinical specimen.

Inventions 865-883: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus viridans* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 687-705 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus viridans* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus viridans* in a sample or clinical specimen.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Invention 884: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of *Salmonella typhimurium* in a sample or clinical specimen, wherein the microarray comprises the gene probe listed as SEQ ID N° 795 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Salmonella typhimurium* in a sample or in a clinical specimen.

A kit for the detection of *Salmonella typhimurium* in a sample or clinical specimen.

Invention 885: claims 1-4, 8, 10-13, 15-25 (partially)

An analytical device for direct identification and characterisation of *Enterococcus flavescens* in a sample or clinical specimen, wherein the microarray comprises the gene probe listed as SEQ ID N° 881 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Enterococcus flavescens* in a sample or in a clinical specimen.

A kit for the detection of *Enterococcus flavescens* in a sample or clinical specimen.

Inventions 886-887: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus hominis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 937, 2906 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus hominis* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus hominis* in a sample.

Inventions 888-889: claims 1-4, 11-12, 15-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Stenotrophomonas maltophilia* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 2871, 2875, 2889-2901 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Stenotrophomonas maltophilia* in a sample or in a clinical specimen.

A kit for the detection of *Stenotrophomonas maltophilia* in a sample or clinical specimen.

REVISED
VERSION

INTERNATIONAL SEARCH REPORT

International application No
PCT/EP2006/010132

A. CLASSIFICATION OF SUBJECT MATTER
INV. C12Q1/68

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
C12Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, EMBASE, MEDLINE, PAJ, WPI Data, Sequence Search

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	NAKAMURA M ET AL: "DEVELOPMENT OF THE DNA MICRO ARRAY FOR IDENTIFICATION OF INFECTIOUS DISEASE CAUSATIVE BACTERIA IN HUMAN" 18 May 2003 (2003-05-18), ABSTRACTS OF THE GENERAL MEETING OF THE AMERICAN SOCIETY FOR MICROBIOLOGY, THE SOCIETY, WASHINGTON, DC, US, PAGE(S) ABSTRNOC219 , XP008047725 ISSN: 1060-2011 abstract ----- -/--	1-8, 10-25

☒ Further documents are listed in the continuation of Box C.

☒ See patent family annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family

INTERNATIONAL SEARCH REPORT

International application No.
PCT/EP2006/010132

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers allsearchable claims.

2. ☐ As all searchable claims could be searched without effort justifying an additional fees, this Authority did not invite payment of additional fees.

3. ☒ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
1-4 (totally), 5-8, 10-18 (partially), 19-25

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☒ The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- ☐ The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- ☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

Invention 1: claims 1-7 and 10-25 (partially)

An analytical device for direct identification and characterisation of microorganisms in a sample or clinical specimen, wherein the device comprises species specific gene probes of at least 100 nucleotides, and in particular a device for Staphylococcus species identification, in particular for S. aureus identification, wherein, in this case, the microarray comprises the gene probe listed as SEQ ID N° 3 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of Staphylococcus aureus in a sample or in a clinical specimen.

A kit for the detection of Staphylococcus aureus in a sample or clinical specimen.

Inventions 2-176: claims 1-25 (partially)

An analytical device for direct identification and characterisation of Staphylococcus aureus in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 1-2, 4-141, 790, 798, 801, 802, 808, 812, 814, 818, 825, 827, 837, 840, 843, 844, 846, 848-852, 854, 855, 859, 862, 875, 885, 896, 897, 904, 907, 908, 935, 942, 2902, 2903, and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of Staphylococcus aureus in a sample or in a clinical specimen.

A kit for the detection of Staphylococcus aureus in a sample or clinical specimen.

Inventions 177-220: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of E. coli in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 142-173, 815, 833, 834, 836, 839, 857, 860, 886-887, 895, 901, 906, and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of E. coli in a sample or in a clinical specimen.

Inventions 221-258: claims 1-6, 8-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Staphylococcus epidermis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 174-208, 786, 806, 826 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus epidermis* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus epidermis* in a sample or clinical specimen.

Inventions 259-269: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus haemolyticus* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 209-215, 796, 803, 820, 938 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus haemolyticus* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus haemolyticus* in a sample or clinical specimen.

Inventions 270-276: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus lugdunensis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 216-221, 888 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus lugdunensis* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus lugdunensis* in a sample or clinical specimen.

Inventions 277-284: claims 1-6, 8-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Staphylococcus warneri* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 224-230, 831 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus warneri* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus warneri* in a sample or clinical specimen.

Inventions 285-286: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus saprophyticus* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 222-223 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus saprophyticus* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus saprophyticus* in a sample or clinical specimen.

Inventions 287-375: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus pneumoniae* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 523-605, 793, 805, 807, 813, 858, 929 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus pneumoniae* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus pneumoniae* in a sample or clinical specimen.

Inventions 376-420: claims 1-4, 6, 11-12, 14-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Streptococcus pyogenes* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 645-686, 800, 856, 928 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus pyogenes* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus pyogenes* in a sample or clinical specimen.

Inventions 421-477: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Klebsiella pneumoniae* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 399-448, 792, 794, 829, 899, 902, 903, 934 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Klebsiella pneumoniae* in a sample or in a clinical specimen.

A kit for the detection of *Klebsiella pneumoniae* in a sample or clinical specimen.

Inventions 478-504: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Klebsiella oxytoca* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 449-469, 789, 799, 816, 822, 898, 943 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Klebsiella oxytoca* in a sample or in a clinical specimen.

A kit for the detection of *Klebsiella oxytoca* in a sample or clinical specimen.

Inventions 505-571: claims 1-4, 6, 11-12, 13-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Pseudomonas aeruginosa* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 470-522, 785, 787, 791, 797, 804, 821, 832, 838, 841, 842, 884, 889, 905, 926 and having a length of at least 100 nucleotides.
 Use of the analytical device.
 An in vitro method for identification and characterisation of *Pseudomonas aeruginosa* in a sample or in a clinical specimen.
 A kit for the detection of *Pseudomonas aeruginosa* in a sample or clinical specimen.

Inventions 572-611: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus agalactiae* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 606-644, 930 and having a length of at least 100 nucleotides.
 Use of the analytical device.
 An in vitro method for identification and characterisation of *Streptococcus agalactiae* in a sample or in a clinical specimen.
 A kit for the detection of *Streptococcus agalactiae* in a sample or clinical specimen.

Invention 612: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus mutans* in a sample or clinical specimen, wherein the microarray comprises the gene probe listed as SEQ ID N° 894 and having a length of at least 100 nucleotides.
 Use of the analytical device.
 An in vitro method for identification and characterisation of *Streptococcus mutans* in a sample or in a clinical specimen.
 A kit for the detection of *Streptococcus mutans* in a sample or clinical specimen.

Inventions 613-633: claims 1-4, 6, 8, 10-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Enterococcus faecalis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 308-398, 809, 811, 835, 864, 865, 880, 891, 909, 933, 936 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Enterococcus faecalis* in a sample or in a clinical specimen.

A kit for the detection of *Enterococcus faecalis* in a sample or clinical specimen.

Inventions 634-659: claims 1-4, 6, 8, 10-25 (partially)

An analytical device for direct identification and characterisation of *Enterococcus faecium* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 810, 817, 824, 847, 853, 861, 866-874, 876-879, 882, 900, 927, 931, 932, 939, 2887 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Enterococcus faecium* in a sample or in a clinical specimen.

A kit for the detection of *Enterococcus faecium* in a sample or clinical specimen.

Inventions 660-736: claims 1-4, 6, 11-25 (partially)

An analytical device for direct identification and characterisation of *Proteus mirabilis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 706-775, 788, 830, 863, 883, 890, 892, 940 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Proteus mirabilis* in a sample or in a clinical specimen.

A kit for the detection of *Proteus mirabilis* in a sample or clinical specimen.

Inventions 737-749: claims 1-4, 6, 11-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Proteus vulgaris* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 776-784, 819, 823, 893, 941 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Proteus vulgaris* in a sample or in a clinical specimen.

A kit for the detection of *Proteus vulgaris* in a sample or clinical specimen.

Inventions 750-835: claims 1-6, 8-25 (partially)

An analytical device for direct identification and characterisation of *Candida albicans* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 231-307, 910-918 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Candida albicans* in a sample or in a clinical specimen.

A kit for the detection of *Candida albicans* in a sample or clinical specimen.

Inventions 836-864: claims 1-4, 6, 11-12, 14-25 (partially)

An analytical device for direct identification and characterisation of *Acinetobacter baumannii* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 2843-2863, 2865, 2866, 2868-2870, 2888, 2907, 2908 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Acinetobacter baumannii* in a sample or in a clinical specimen.

A kit for the detection of *Acinetobacter baumannii* in a sample or clinical specimen.

Inventions 865-883: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of *Streptococcus viridans* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 687-705 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Streptococcus viridans* in a sample or in a clinical specimen.

A kit for the detection of *Streptococcus viridans* in a sample or clinical specimen.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Invention 884: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of *Salmonella typhimurium* in a sample or clinical specimen, wherein the microarray comprises the gene probe listed as SEQ ID N° 795 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Salmonella typhimurium* in a sample or in a clinical specimen.

A kit for the detection of *Salmonella typhimurium* in a sample or clinical specimen.

Invention 885: claims 1-4, 8, 10-13, 15-25 (partially)

An analytical device for direct identification and characterisation of *Enterococcus flavescens* in a sample or clinical specimen, wherein the microarray comprises the gene probe listed as SEQ ID N° 881 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Enterococcus flavescens* in a sample or in a clinical specimen.

A kit for the detection of *Enterococcus flavescens* in a sample or clinical specimen.

Inventions 886-887: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of *Staphylococcus hominis* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 937, 2906 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Staphylococcus hominis* in a sample or in a clinical specimen.

A kit for the detection of *Staphylococcus hominis* in a sample.

Inventions 888-889: claims 1-4, 11-12, 15-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of Dictyostelium discoideum in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 945, 947 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of Dictyostelium discoideum in a sample or in a clinical specimen.

A kit for the detection of Dictyostelium discoideum in a sample or clinical specimen.

Inventions 890-892: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of Streptococcus dysgalactiae in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 2842, 2904, 2905 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of Streptococcus dysgalactiae in a sample or in a clinical specimen.

A kit for the detection of Streptococcus dysgalactiae in a sample or clinical specimen.

Inventions 893-907: claims 1-4, 11-12, 15-25 (partially)

An analytical device for direct identification and characterisation of Enterobacter cloacae in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 2864, 2967, 2872-2874, 2876-2886 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of Enterobacter cloacae in a sample or in a clinical specimen.

A kit for the detection of Enterobacter cloacae in a sample or clinical specimen.

Inventions 908-922: claims 1-4, 11-12, 15-25 (partially)

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

An analytical device for direct identification and characterisation of *Stenotrophomonas maltophilia* in a sample or clinical specimen, wherein the microarray comprises one of the gene probes listed as SEQ ID N° 2871, 2875, 2889-2901 and having a length of at least 100 nucleotides.

Use of the analytical device.

An in vitro method for identification and characterisation of *Stenotrophomonas maltophilia* in a sample or in a clinical specimen.

A kit for the detection of *Stenotrophomonas maltophilia* in a sample or clinical specimen.
